

HRP Peroxidase Goat Anti-Rabbit IgG (H+L)

Product:	HRP Peroxidase Goat Anti-Rabbit IgG (H+L)
Code Number:	TD-AB2017
Conjugate	Horseradish Peroxidase (HRP)
Physical State:	Liquid
Size:	20ul/50ul/100ul
Antibody Concentration:	0.8 mg/ml
Suggested Dilution Range:	1:500 - 1:5,000 for immunohisto/cytochemistry 1:5,000 - 1:100,000 for ELISA and Western blotting with chromogenic substrates 1:10,000 - 1:200,000 for Western blotting with ECL substrates
Buffer:	0.01M Sodium Phosphate, 0.25M NaCl, pH 7.6
Stabilizer:	15 mg/ml Bovine Serum Albumin (IgG-Free, Protease-Free)
Storage:	Store at 2-8°C under sterile conditions.
Purity:	Affinity chromatography with Protein A/G

Background:

Immunoglobulin G (IgG) is one of the most abundant proteins in serum with normal levels between 9.5-12.5 mg/ml in adult blood. IgG is important for our defense against microorganisms and the molecules are produced by B lymphocytes as a part of our adaptive immune response. The IgG molecule has two separate functions; to bind to the pathogen that elicited the response and to recruit other cells and molecules to destroy the antigen. The variability of the IgG pool is generated by somatic recombination and the number of specificities in an individual at a given time point is estimated to be 1011 variants.
